

This architectural cross-section diagram illustrates a multi-story building complex. The ground floor features a parking garage with several levels of cars. Above the garage, there is a public plaza area with a blue walkway, labeled 'plaza de pie'. The upper floors show various building sections, some with glass facades and others with solid grey or black panels. A green roof with vegetation is visible at the very top. Labels in Spanish provide specific details: 'econo aparcamiento' (economy parking) on the left; 'Galería' and 'recreación plena' (full recreation) in the middle; 'vehi' (vehicle) below the walkway; 'aparcamiento' (parking) on the right; and 'paseo a pie' (pedestrian walk) at the top right. A vertical dimension line indicates a height of 45 meters.

This architectural cross-section diagram illustrates a multi-story building's vertical layout and surrounding urban environment. The building's height is indicated by vertical axes on the left, ranging from -24.50 at the bottom to +24.50 at the top. The diagram shows several levels of the building, each with specific labels:

- Ground Level:** Features a parking garage with multiple cars, labeled "aparcamiento".
- Level -1:** Labeled "vestíbulo" (lobby) and "vestidores" (changing rooms).
- Level 0:** Labeled "vestíbulo" and "vestidores".
- Level +1:** Labeled "zona social" (social area).
- Level +2:** Labeled "área de monitoreo" (monitoring area) and "área de actividad" (activity area).
- Level +3:** Labeled "área infantil" (children's area).
- Level +4:** Labeled "zonas verdes" (green zones) and "plataforma deporte" (sports platform).

The diagram also depicts the building's relationship to its surroundings, including a street level with "vías a la ciudad" (city streets) and "área verde" (green area). A tall pole or antenna is shown on the right side. The overall design emphasizes integration with the urban landscape and provides various spaces for different activities.

POLIDEPORTIVO Y APARCAMIENTO

PROMOTOR: Exmo. Ayto. Madrid

2º PREMIO

alcántara 24/26

La solución espacial se configura mediante tres elementos claros e íntimamente relacionados:

El primer elemento lo conforman dos planos, un gran plano hacia la calle Alcántara que es a la vez cubierta de la piscina y suelo de las pistas deportivas, y el plano del suelo a cota cero, que se prolonga hacia la zona verde con pequeñas variaciones de materiales y cotas.

El segundo elemento es una torre que se proyecta adosada a la medianera, resolviendo dicha herida urbana y facilitando una orientación sur a sus espacios.

Por último, el parque como tercera pieza del conjunto que juega un importante papel de relación (física y visual) entre el edificio y la ciudad.
